

STAYCO Construction
Attn: Dale Stayman

December 18, 2002

Dear Dale,

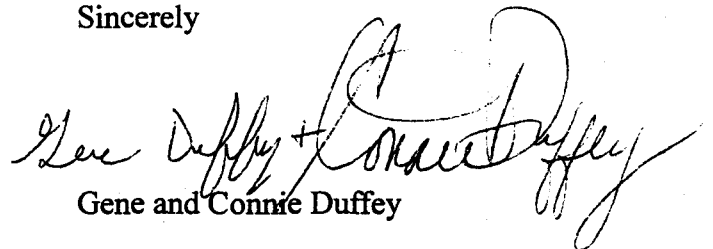

My wife and I would like to extend our appreciation for the excellent job you have done working with us to build the home of our dreams. You invested many hours speaking with us and explaining important information that was necessary for us to understand what steps are needed to create the wonderful home we now have for our family. Building a home is not an easy process, but you always managed to maintain adequate communication in order for us to make the proper decisions. We discussed concerns of time commitments and our budget and you managed to see that the job got done and within the means we had specified. We appreciated these things very much and feel this certainly says a lot about your integrity.

We would like to also extend a very special thank you to your crew (Scott, Rick, Victor and Bill). All of these men were very talented, courteous and helpful each and every step of the way. Their professionalism and skills are evidenced throughout our fine home. It is obvious they all take pride in their work.

As you are well aware we visited our construction site daily, sometimes two and three times a day. Each and every time we were able to witness timely progression without any shortcuts being taken. Since this is our first home we were excited and had many questions. It didn't seem to matter if we had questions we could feel comfortable in asking anyone from your wife Debbie to your son Devin. Everyone was always very helpful, patient and professional. It is also important to mention that you also provided excellent after sale service and follow-up when we needed assistance.

We again want to say thank you for our quality home. We would highly recommend you to any future homebuilder. From the professionalism to the quality of our home, you all have provided us the home we dreamed of! We would gladly recommend STAYCO to any of our friends.

Sincerely

Gene and Connie Duffey
